DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this section can be found in the prior office action.
2. The prior office actions are incorporated herein by reference. In particular, the observations with respect to claim language, and response to previously presented arguments.
3. Examiner withdraws objection to the drawings and specification due to correction by the applicant.
4. Examiner withdraws objections of claims 6, 10 and 12 due to corrections by Applicant.
5. Claims 1-5 and 7-9 have been cancelled.
6. Claims 6, 10 and 12 have been amended.
7. Claims 6 and 10-12 now re-numbered, as claims 1-4 are pending.

Response to Arguments

8. Applicant's arguments filed 07/19/04 have been fully considered and they are persuasive.

Allowable Subject Matter

9. Claims 6 and 10-12 are allowed.

The following is an examiner's statement of reasons for allowance: Davis et al (6,064,736 A) teach a computer network, a method and a computer program product (see fig.1 where a computer is connected to a local area network; col.3, lines 26-33) comprising: a local computer (see fig.1; col.3, lines 28-39), a userid associated with a user of the local computer (see fig.2, item 207 user id; col.3, lines 41-43 where a user id is associated with a client computer of the user), said userid having a secret password associated therewith (see fig.3 where the userid is associated with a password, item 309 and 307; col.4, lines 42-46); a host computer (see col.4, lines 45-46 where the server is the host computer; col.3, lines 41-55; fig. 2 and 3 where the items 204 and 304 are the host computer respectively), a communications mechanism connecting the host computer to the local computer (see fig.1; fig.2-3 where the communication between the client and the server is being shown) wherein the local computer, requests access to the host computer by: sending the userid and a first nonce to the host computer (see fig.2, item 207 where the userid and the first nonce are transmitted from the client to the server or the host computer); the host computer responds to the local computer by sending a second nonce to the local computer (see fig.2, item 217 where the host computer or the server send second nonce called server nonce to the client or local computer).

Davis singly or in combination do not teach the specific steps of Applicant's invention method and system and computer program product where securely

changing an existing password associated with a user identifier users on a host computer to a new password, wherein said passwords enable a user associated with said users at a local computer to access information on said host computer across a network, said method comprising the steps of: computer readable programming means for sending, by the local computer, the users and a first nonce to the host computer; computer readable programming means for replying, by the host computer to the local computer, with a second nonce; computer readable programming means for generating, by the local computer, a first digest of the users and the existing password and a second digest of the users and the new password; computer readable programming means for creating, by the local computer, an authentication token and an authentication token mask wherein said authentication token is a hash function of the first digest, first nonce and second nonce, and said token mask is a hash function of the second digest, first nonce plus a predetermined value and the second nonce, computer readable programming means for generating, by the local computer, a protected digest by exclusive-oring the second digest with the token mask; computer readable programming means for sending, by the local computer to the host computer, the users authentication token and the protected digest; computer readable programming means for verifying, by the host computer, the validity of the authentication token; and, computer readable programming means for accepting the new password to replace the existing password if the authentication token is valid as recited in **independent claims 6 and 10**.

10. Dependent claims 11 and 12 as being dependent upon Independent claim 10 and having additional allowable features therein.

Conclusion

11. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "comments on statement of reasons for allowance."
